

AMINO POWER

Natural plant stimulant for use in all agricultural crops.

Amino Acids are some of the basic building blocks of life.

Amino Power can be absorbed directly into the plant leaf and root system for an immediate effect. It stimulates the plant to help with:

- Preventing &/or recovering from stress caused by heat, cold, physical damage due to storms & pests.
- Increasing chlorophyll production and improve the rate of photosynthesis.
- Opening of stomata - maintaining metabolic processes (growth).
- Induces flower function, pollen tube formation, pollen germination.
- Fruit ripening and quality.

DIRECTIONS FOR USE

Amino Power is used in a wide variety of agricultural enterprises. It is suitable for use as a foliar spray and via irrigation. When mixing, fill spray tank half full with water and add the required amount of Amino Power while continuing to fill tank with water. Also add Fish Emulsion as spray oil or surfactant just before tank is full of water. Continue agitation through the spray operation. (JAR TESTS are always recommended for tank mix compatibility).

Re-seal bag after use.

APPLICATION RATES

Horticultural Crops (Trees, Vines, Vegetables)

Dilute at 1:200 with water.

Foliar Spray: 1-2.5 kg/ha

Trees & vines:

Apply at key growth stages:

Early growth, flowering, fruit set, fruit fill, post harvest.

Vegetables:

Apply every 2 - 3 weeks.

STORAGE

Store in original container away from direct sunlight & moisture.

BIO - STIMULANTS

Amino Power

80% Amino Acids

- Promotes plant growth
- Improves stress tolerance
- Helps flowering and fruiting
- Directly absorbed by plant leaves and roots
- Made from hydrolysed plant protein

THE PLANT

PRECAUTIONS

Physically compatible with a wide range of commonly used products. Always mix a small quantity (jar test) and check for physical compatibility before combining with other ingredients.

When applying for the first time, or in combination with other products, a small test area should be sprayed and observed prior to the total spray.

Exceeding 1:100 concentration can create a phytotoxic reaction in concentrated form.

Do not apply as a foliar spray in conjunction with copper based products as increased activity of copper may produce unacceptable levels of phytotoxicity.

If produce is susceptible to staining, avoid spraying close to harvest.

Do not apply as foliar spray during flowering.

WARNING

Avoid inhaling dust. Do not swallow. Avoid contact with eyes and skin.

Wear protective clothing including dust respirator, safety glasses & gloves when using this product.

CLEAN UP PROCEDURE

Use all mixture in spray and irrigation tanks; purge tanks and lines with clean water; flush irrigation lines. Do not return mix to original drums.
