

FULVIC ACID POWDER

Fulvic Acid Powder is widely known for its ability to:

- Improve the uptake of nutrients by plants in foliar applications.
- Bond with plant nutrients to reduce their immobilisation in the soil.
- Promote quicker seed germination, faster root and shoot growth.
- Provide a valuable source of active carbon for soil microbes.
- Offer drought protection due to improved water storage.

DIRECTIONS FOR USE

Ensure all product is dissolved prior to application. To produce a dissolved concentrate, mix at 1:10 with water; do not add solid to spray tank. Add the Fulvic Acid Powder to warm water slowly. Always mix under vigorous agitation. Test compatibility before using with other products. Care must be taken when mixing. Wear protective clothing, face mask. Avoid inhalation. Apply 3 - 5 L/ha of the dissolved concentrate via boom spray or via irrigation.

APPLICATION RATES

Foliar Spray: Apply 100-300g/100L water.

Via irrigation: Apply 0.3 - 1.0kg/ha.

Granular Fertiliser Coating: Blend at 1 - 3 kg per tonne.

Herbicides/Pesticides: 20 - 50g in 50L spray mix per ha

(always pre-mix with water).

Seed Treatment: 4-5kg per tonne seed.

SOIL HEALTH

Fulvic Acid Powder

Foliar fertiliser uptake enhancer

All the benefits of fulvates in a cost effective powder:

- 85% fulvic acid
- 98% water soluble
- Provides a valuable source of carbon for soil microbes
- Used to buffer UAN foliar sprays

25kg

ACTIVE CARBON

WATER SAVER

MICROBIAL ACTIVITY & DIVERSITY

CLEAN UP PROCEDURE

Use all mixture in spray and irrigation tanks; purge tanks and lines with clean water; flush irrigation lines. Do not return mix to original container.

STORAGE

Store in original container away from direct sunlight and moisture.

PRECAUTIONS

Physically compatible with a wide range of commonly used products. Always mix a small quantity (jar test) and check for physical compatibility before combining with other ingredients.

WARNING

Keep out of reach of children.

Avoid breathing dust.

Avoid contact with eyes. Immediately flush with water for at least 15 minutes if in eyes.
