

LIQUID GYPSUM

A free flowing energised liquid suspension of micronised gypsum. It provides a microbe friendly source of calcium and sulphur, two commonly deficient nutrients.

DIRECTIONS FOR USE

Pre-mix thoroughly with equal quantity of water prior to adding to spray tank. Add to full tank after agitation. Ensure spray tank is constantly agitated during use. For best results use with spray oil.

This product contains solid material and may leave residue on leaves or in irrigation systems. If this is a concern then apply via soil drench.

Always agitate drum contents before use.

APPLICATION RATES

Horticulture:

Pre-plant (injection) : 5 - 10L/ha

Via irrigation : 5 - 10L/ha'

Minimum dilution rate:

1 : 50 Liquid Gypsum to water

TYPICAL ANALYSIS

Calcium 32% w/v

Sulphur 3% w/v

ORGANIC FERTILISER - LIQUID/POWDER

Liquid Gypsum

Liquid suspension of micronised gypsum

- Microbe friendly source of calcium and sulphur, two commonly deficient nutrients, that improve soil and plant health
- Improves soil structure of sodic soils
- For use via irrigation or as a soil drench
