

NEW ERA CUSTOM BLENDS

Blends are typically based on pelletised organic fertiliser from composted poultry manure.

They provide a microbe friendly source of nutrients for improved soil and plant health.

The major difference between organic/sustainable fertilisers and synthetic fertilisers is the effect on beneficial soil biology and the solubility of the fertiliser.

APPLICATION RATES

Suitable for fruit and nut trees, vines, vegetables, row crops, tropical fruit, turf, pastures and cereals.

Application rates:

- 200kg to 2t/ha
depending on blend

TYPICAL ANALYSIS

Depends on the particular blend.

ORGANIC FERTILISER - SOLID

New Era Custom Blend
