

## NEW ERA HIGH N

A high quality, high analysis pelletised organic fertiliser. It provides a microbe friendly source of nitrogen, phosphorus and potassium for improved soil and plant health.

High N provides a combination of available and slow release nitrogen.

The major difference between organic/sustainable fertilisers and synthetic fertilisers is the effect on beneficial soil biology and the solubility of the fertiliser.

## APPLICATION RATES

Suitable for fruit and nut trees, vines, vegetables, row crops, tropical fruit, turf, pastures and cereals.

Use as a side-dress or pre-plant. Confirm your requirements via soil & tissue analysis.

Application rates:

- 200kg to 2t/ha.
