

OFS HUMUS 100

Improves soil health by improving fertiliser efficiency, soil water holding capacity and providing a food source for soil microbes. High solubility provides easy use through sprays and drip irrigation. Certified input for organic farming.

DIRECTIONS FOR USE

OFS Humus 100 is used to provide increased nutrient and moisture retention to soil. Suitable for use as a dry soil treatment or diluted for use as a soil drench and via irrigation.

Applied through standard spraying equipment. Always mix under vigorous agitation. Ensure all product is dissolved prior to application. Pre dilute at 1:10 with water; do not add solid to spray tank. Test compatibility before using with other products.

APPLICATION RATES

Via Irrigation:

2-4kg/ha applied 2-4 times during growing season. Dilute 1:200 with water.

Broad-acre crops and pastures:

1-3 kg/ha applied early in season. Dilute at 1:200 with water.

Fertiliser Coating:

Apply 1-2kg per tonne of urea; can be dissolved at the rate of 1kg OFS Humus 100 into 5L water before applying to fertiliser.

Organic Farming Systems (OFS) has no control over farming methods, application of the product, irrigation systems, weather or growing conditions. Consequently, no responsibility or liability for any failure in performance, losses, damages or injuries will be accepted by OFS, its distributors or agents following the use of this product. Seek independent advice prior to use.

FARMING SYSTEMS

HUMUS 100

Concentrated Soil Conditioner

Highly soluble humate designed to improve fertiliser and moisture retention; also used as a microbial food source.

For soil and fertiliser application.

Contains: >80% K-humate as humic and fulvic acids (with potassium)

TYPICAL ANALYSIS

Total Water Soluble Humate
and Fulvate >80%

CLEAN UP PROCEDURE

Use all mixture in spray and irrigation tanks; purge tanks and lines with clean water; flush irrigation lines. Do not return mix to original drums.

STORAGE

Store in original container away from direct sunlight and moisture.

YOUR FARMING FUTURE

Many farmers are turning to soil health to optimise profits. Ensure your crop performance using our products and cost-effective crop programs.

Why our products and programs work for you!

- Improved soil moisture
- Nutrients are accessible when plants need them – available and slow release.
- Naturally balanced fertility
- Increased beneficial microbe activity.
- Improved fertiliser uptake.
- Reduced leaching of fertiliser.
- Buffering of soils against salinity.
- Improved root growth.
- Improved soil health – safe for soil microbes.

You'll see the difference!
