

Sultana Grapes

Vitazyme Testimonial

***Vitazyme improves vine colour & growth
within 3 days***

Crop

Sultana grapes - dried fruit

Grower

Norm Clyne & Craig Clyne from Clyne Farms

Products

Organic Nitrogen, Liquid Phosphorus, Humus 26, Vitazyme, Super Kelp

Program

Organic Farming Systems provided a production program for vines in August 2010.

Results - grower comments

"We are really happy with the vine growth this year based on the program provided by Organic Farming Systems. We also used a Vitazyme program on three blocks of sultana grapes and saw a dramatic difference in vine colour & growth within a few days of application."

"2010/11 has been a very difficult season to manage downy mildew disease in vines ... the three Vitazyme treated blocks also had our lowest incidence of disease (< 2% disease)."

*Craig Clyne & Warren Seaman
(Clyne Farms) (EE Muir)*

***"We are definitely using
Vitazyme on all our vines
next season."***
