

Almonds

Biological Program

Crop Growth Stage	Pink Bud	Bud Burst	Flowering	Leaf Growth	Nut Growth - Hardening to Split		Harvest	
		Root Growth 				Nut Growth	Bud Development 	
Crop Stress Points		Cold Temp Sensitive				Energy for Bud Development		
				Heat Stress effects Floral Bud Development				
			Water Stress			Water Stress		
Crop Health Program								
	Super Kelp 10L/ha		Super Kelp 10L/ha			Super Kelp 5L/ha		
 Energise the Tree		Vitazyme 1.5L/ha	Vitazyme 1.5L/ha			Vitazyme 1.5L/ha		
				Grosil 2-4L/ha		Grosil 2-4L/ha		
Soil Health Program								
 Microbial Activity			Fish Plus 5-10L/ha; monthly; 3-4 times					
+C Add Carbon		Humus 26 10L/ha				Humus 26 10L/ha		

Notes

Vitazyme for stress events, energy levels at key times for current season production and floral bud development.
 Super Kelp to be used as alternative to Vitazyme if preferred by grower
 The duration of growth stages and stress sensitivities will vary depending on variety, growing region, soil type and environment.

Soil Essentials - Strategies ... it all starts with the soil!
