

Carrots - Case Study

Vitazyme improves carrot growth (17-34%)

Two demonstration sites, each with 2 x 1L/ha Vitazyme applications; one demo had earlier application times relative to seeding.

Vitazyme Treatments:

- Control: Farmer's Program
- Vitazyme: Soil/Foliar spray plus farmer program

Vitazyme Program:

- Demo 1 (early): - Soil Spray - 5 DAS; Vitazyme - 1L/ha
- Soil & Foliar Spray - 48 DAS; Vitazyme - 1L/ha
- Demo 2 (mid): - Soil & Foliar Spray - 28 DAS; Vitazyme - 1L/ha
- Soil & Foliar Spray - 69 DAS; Vitazyme - 1L/ha
- Monitoring: - Demo 1 - Sampled to show early growth (g/carrot)
- Demo 2 - Sampled at harvest to show final growth (g/carrot)

Results:

Demo 1 - Mid crop sample; 34% increase

Demo 2 - Sample at Harvest; 17% increase
