

DESCRIPTION

Vitazyme Seed Treatment (ST) is a scientifically formulated liquid seed treatment that promotes root growth and seedling vigour.

It contains powerful natural bio-stimulants that provide multiple modes of action, activating plant metabolism and root zone microbial activity.

The larger root biomass increases the survival rate of seedlings by enabling the crop to take up moisture and nutrients in critical early stages.

For healthy well-developed root systems, better emergence and vigour, leading to better crop performance.

Used to treat all seed types.

Can also be used as a foliar spray and via irrigation.

DIRECTIONS FOR USE

Vitazyme ST can be mixed with other seed treatments, including most fertilisers, fungicides, insecticides and inoculants. It is not pH sensitive and can be used with acidic and alkaline products. When mixing, test for compatibility with a small quantity in a jar.

CLEAN UP / STORAGE / SAFETY

Use all product mixed with water, within 24 hours. Do not return mix to original drums. Store in original container, away from direct sunlight.

Not classified as hazardous. See SDS for safety instructions.

CROP STRESS

Activates plant metabolism & vigour

- Better root growth
- More vigorous seedlings
- Better emergence
- Activates plant metabolism and root zone microbial activity

APPLICATION GUIDE

Target application rate is 100-200ml/ha of seed.

Seed size and seeding rate per ha influence final Vitazyme ST application rates per kg of seed.

Vitazyme ST can be applied as a concentrate or diluted with water to allow even coverage of seed.

Crop	Rate
Barley	1.0 - 2.5L/tonne
Beans	1.5-3ml/kg
Canola	40-80ml/kg
Carrots	40-80ml/kg
Corn/Maize	5-20ml/kg
Cotton	10-20ml/kg
Lupins	1.0 - 2.5L/tonne
Melon	50-100ml/kg
Oats	1.0 - 2.5L/tonne
Onions	50-100ml/kg
Rice	1.0 - 2.5L/tonne
Sorghum	12.5-25ml/kg
Soybeans	1.5-3L/tonne
Spinach	6.5-12.5ml/kg
Wheat	1.0 -2.5L/tonne
Foliar Spray Rate:	500ml - 1L/ha
