CROP HEALTH

CORN

- Seed Treatment
- Micro-encapsulated Trichoderma
- Promotes root growth and yield Next generation endophytic species
- Switches on gene pathways
- Can be used with phosphate fertilisers

Contains Trichoderma spp7 x 10⁷ CFU/g. For field corn, popcorn, sweet corn and sunflowers Best stored at a constant temperature from 4 to 24°C.

30q

DIRECTIONS FOR USE

Rate: 30 g per 25kg of seed.

Apply as a dry seed treatment prior to planting.

Depending on equipment:

- Shake contents of pack across seed in plant box and mix, or
- Sprinkle Sabel-X Corn onto seed in bag. Treat in one bag increments to ensure uniform coating of seed.
 Shake bag or mix until uniform coverage is obtained.

Plant treated seed the same day as treatment

Store away from food stuffs at a constant temperature from 4 to 24^0C out of direct sunlight. Do not refrigerate, freeze or allow to overheat.

- Contents may settle. Shake well before use.
- Do not inhale product dust.
- Avoid contact with eyes and skin. If skin or eye contact occurs, flush with copious amounts of clean water.
- Do not eat, drink or smoke while handling the product or before washing hands.
- Wash hands with soap and water after use.
- Destroy empty bag and do not use for any other purpose.
- Prevent contamination of food, feeds, drinking water and eating utensils.
